2 EXTRA CORD PLIES
UNDER THE TREAD AT NO EXTRA COST

Get your money's worth—buy Firestone—the tire that gives you 25-40% longer tire life at *no extra cost*. Among other things, Firestone gives you 2 Extra Cord Plies under the tread for extra strength, extra safety, and extra value. Worn tires are dangerous—replace them now. See the nearest Firestone Dealer today—let him equip your car with the strongest and safest of tires.

Firestone TIRES

Stony Plain and District

Mrs G A Sander, of Naco, was a week-end visitor with Mrs Donaldson.

Miss Christine Pailer, who has been recuperating at her home here, returns shortly to Vegreville, to resume her duties in the hospital.

His many friends were pleased to note Mr Walter Samson has made a complete recovery from his recent illness.

Mr Murray Barnes, manager and agent for Stony Plain's Co-operative Store, is in attendance today, the 31st, at Gainford, where delegates from all the Co-ops in the S. P. Constituency are holding a convention.

Owing to a derailment up the line west on Sunday, the mail train from Prince Rupert came thru about four hours late.

Basketball Notes.

Coach Moyer took his basketball team to Holborn on the holiday and played in 2 contests, which resulted: Stony 12, Strawberry Creek 2; Stony Plain 22, Bright Bank 4. Stony Plain line-up: E Fischer, R Leeder, I Zucht, M Campbell, I Michael, Margaret Pailer, Esther Dambacher, G Pailer.

The Spruce Grove basketball girls played the local Walther League team here Friday Evg. Score—Spruce Grove 16, Walther League 4. Walther League's line-up: Amy Foerster, Louise Oppert, Hansner, Ida Zucht, Viola Goetz, Elsie Fuhr. Ph Enders referee.

Accident on Jasper Highway.

While a star driver with a Star car from the Star garage in the City was motoring out to Wabamun on the holiday he failed to negotiate the John Fuhr curve on the Jasper Highway at Blueberry, with a consequence that the car and occupants went over a rather steep grade. Altho the auto was pretty badly wrecked, the occupants escaped with only slight injuries, and were driven in to Stony Plain by Mr Louis Mayer.

UFA Co-ops. to Meet.

A convention of delegates from the UFA Locals in the Stony Plain Constituency, that are connected with the Constituency Co-op. Ass'n, has been called, to be held up at Gainford on Thursday, May 31. Of the 30 UFA Locals in the Constituency, 10 of these are hooked up with the Co-op. Ass'n, and the delegates from these are to have a lot of important matters to discuss at the meeting.

A Movie This Thursday Evg.

Mr Goodman's showing of good pictures in Stony has met with such success he has decided to show here every Thursday, commencing this evening, May 31. The attraction for this evening will be "Reunion in Vienna," with John Barrymore and Dianna Wynward. This picture should fill Moose Hall to capacity.

Obstacles To International Agreement

Obstacles to international agreement are many and various; so many, so various as to baffle the vision of the conferees and defeat the ends sought.

Particularly is this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they proclaim, invariably dissonance interrupts the even tenor of the proceedings, divergent points of view protrude themselves and, with each interruption and each protrusion, practical agreement becomes the more remote.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the methods by which that objective can be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferences held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through recurrent manifestations of local interest, local jealousies, pride and susceptibilities. In matters such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national interests and prejudices are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, they have seldom been effective because they have been largely ignored.

In spite of the League and the large body of opinion supporting it, where matters of national significance have been broached, the nations involved have proved a law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground this conflict of national viewpoints, and this insensate desire for autonomy in matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and safe basis. It is equally true, however, that there is sharp clash of opinion as to what the basis should be and as to the methods whereby it should be undertaken. World disarmament conferences have proved futile, so far, in spite of the unanimity voiced by national spokesmen as to its desirability. All nations, it appears, are in favor of disarmament—provided the other fellow does it.

Strange as it may seem, while world conferences on the question are disheartening failures, the same can not be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amicable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany, it becomes immediately impossible to focus all eyes on the same objective and on the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise as between nation and nation is easy; between three nations it is a little more difficult, but less difficult than when four nations are involved. Perhaps then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved and all the nations are committed to peace.

The same course may be found the ultimate solvent of the world wheat problem. Apparently, the London Wheat Agreement has foundered on the shoals of national aspiration for, as this is written, the Argentine has virtually negated the good work accomplished in the London conference, and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference resulted in what has been acclaimed as a unanimous agreement representing the first really co-operative arrangement yet reached by the nations of the world. It was not, however, a finite thing, in itself. It left certain important decisions for later consideration, particularly the matter of minimum prices. Experts met at Rome to discuss prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and demands from that country for an increase of 40,000,000 bushels in her quota allotment. Having already virtually exhausted her export quota for the year as set in the London Agreement, the Argentine demanded an additional 40,000,000 which could only be given at the expense of other great exporting countries, including Canada. The price conference, however, reached certain tentative conclusions which were submitted to the governments involved.

The next stage in the proceedings was the London conference on prices to amend or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not price-fixing by a central body is a sound practice to adopt. In fact, British grain men have been emphatic and outspoken on the subject. The head of the London grain exchange had no hesitation in stating that the representatives of the various nations were amiable gentlemen "but that they knew very little about wheat." With warnings against price-fixing, demands for increased quotas, and threats of unlimited production, the whole agreement appears in jeopardy. Obviously, the complexity of national interests is accentuated in conferences on so large a scale as that at London. Perhaps (he it repeated) the solution may be found in a series of bilateral agreements involving all interested parties.

Health For Young Girls Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness makes life a burden.

The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spells of dizziness, of weakness and discouragement, and the tired, languid feeling disappear with the use of Milburn's H. & N. Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

Wants Room For Expansion

Mussolini Expresses Need For Italy To Seek Room In Africa And Asia

Geographic and historic reasons were given by Mussolini in an interview with Renato Bywater, editor of the "Daily Telegraph" in Rome, for the expansion of Italian power in Africa and Asia, and the need for a strong navy.

During the interview, Mussolini said:

"Thirty provincial capitals are situated on the coast. Rome herself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say: "Geography and history both warrant us in taking Asia and Africa as objectives. We are nearer to those two continents than any of the greater western European powers. No one should mistake the meaning of our task. We are not thinking of any territorial conquest, but every one should know that we are thinking of a natural expansion allowing us to co-operate with the nations of Africa and the Far East."

Mussolini then turned to the problems of the League of Nations and of disarmament, saying:

"The principle of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered should only be undertaken after the closing of the disarmament conference, because if this conference fails, there will be no need to consider the reform. It will be enough to consider the work of the League of Nations as ended."

"It is generally considered that the conference will fail, at least as regards the most important objectives. The greatest armed power will not disarm; those that are not armed will be in a position to arm with a more or less defensive purpose."

Paris Hotels Face Ruin

Taxes Heavy And American Tourist Business Falling Off

Instead of opening the customary new extensions at the tourist season starts, one leading Paris hotel, the Plaza-Athene, already has closed its doors, and numerous others are on the verge of doing likewise.

Hotel managers blamed two factors for their plight. First, that an average of one-third, of all money taken in must be sent to the state in the form of taxes. Secondly, that the American tourist business has almost evaporated.

"If this continues for a short time more we'll have to close up, too," the director of a leading hotel in the Etoile district declared.

Here are a few of the hotel taxes: Six per cent. of every penny collected as a luxury tax.

Four per cent. of all room bills as a city tax.

A social insurance tax.

A tax for apprentices.

A tax for mutilated soldiers.

A tax for operation.

A property tax.

This totals from 25 to 50 per cent. of receipts.

Trying To Find Secret

Manufacturers Seek Buddhist Method Of Producing Stainless Steel

To study 5,000 volumes which have stood for 2,000 years without showing a sign of decay or rust, a body of European steel manufacturers are visiting India. They hope to learn how people of those days produced stainless steel. The columns were erected by Asoka, the great Buddhist emperor, in four districts of his Indian Empire. Each stands on a high rock and is inscribed with the laws of Asoka's reign. Through the centuries earthquakes have not shaken them and storms have not rusted them. The secret of their making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

The fox-tail lily is a striking looking plant for the back of a large border. It is also known as "the desert candlestick" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a candle.

"Britain Of The East"

Story Of Japan's Progress And Development Reads Like Romance

Whatever may be said of the aggressiveness of Japan in the Orient, it must be acknowledged that she deserves the designation, "The Britain of the East." Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions she has gone forward in the path of educational and scientific progress and in industrial development at a remarkable rate.

Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation so perfectly equipped with a technical and scientific point of view that her competition may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made.

Soybeans Profitable

The Farmers' Advocate says many livestock men, and dairymen particularly, are finding soybeans a profitable crop to grow. The beans add to the protein content of the meal mixture and for hay they are both productive and palatable.

Almost Instant Relief From Neuralgia

1. I'LL HAVE TO GET A TAXI AND GO HOME. I'VE DEVELOPED A TERRIBLE ATTACK OF NEURALGIA.

MARY WHY DON'T YOU TRY 2 ASPIRIN TABLETS. THEY'LL GET RID OF YOUR NEURALGIA IN A FEW MINUTES.

2. 20 MINUTES LATER — IT'S WONDERFUL HOW QUICKLY MY NEURALGIA WENT. THAT ASPIRIN CERTAINLY WORKS FAST.

YES, ISN'T IT WONDERFUL!

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of your pain minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly by you swallow it. And thus is ready to go to work almost instantly.

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet in a glass of water. Note that BEFORE it touches bottom, it has started to disintegrate. What it does in this glass it does in your stomach. Hence its fast action.

Scientists Invite Us To Enlarge Our Concept Of Universe Beyond Anything Heretofore Presented

Findings Of Scientist Regarding Universe Cannot Be Grasped

Late news from the astronomical world raises this serious question: Is there collusion between the Administration at Washington and the devout astronomer for the purpose of making the world familiar with large numbers? Or is it rivalry in the expansion of the Arabic notation? Whatever the answer be, the latest from that redoubtable searcher of the beyond, Dr. Edwin P. Hubble of the Mt. Wilson Observatory, invites us to enlarge our concept of the universe far beyond anything heretofore presented by Jeans, Eddington, Millikan and the others, fervid expansionists though they be.

Dr. Hubble's findings are little short of breathtaking. The universe, declares he, is a finite sphere with a diameter of some six billion light years; and when this distance is calculated on the fact that light travels at a speed of 186,000 miles a second, the Arabic notation itself is put to the test. But that is only the beginning of his astounding declaration. The universe consists of 500,000,000,000,000 (five hundred trillion) nebulae, each stellar unit of which is 50,000,000 times as bright as the sun and 800,000,000 times as massive. How these figures stagger the imagination!

And only a year ago, Dr. Hubble was content with observing, through the 100-inch telescope on Mt. Wilson, nebulae 150,000 light years away. Who shall say this has not been a year of unprecedented expansion?

We are also assured that beyond this universe, 500,000,000,000 light years in diameter, nothing exists, not even cosmic dust. That is to say, this universe with which Dr. Hubble deals so familiarly marks the end of space, for it is held that space cannot exist without matter.

Here is another important fact. The totality of this mass of matter in the universe has not increased. Because of the constant expansion, it follows, then, that the distance between the component units has greatly increased, that is to say, it is continually an emptier universe. In the question of mass, Dr. Hubble likens the earth to a grain of sand in this immense space.

If all these marvelous details of this expanding universe have been revealed through a 100-inch telescope, what further wonders will be discovered when the huge mirror now cooling at Corning, N.Y., is ready for use? Dr. Hubble believes that beyond the present frontier will be found countless galaxies or nebulae, all moving at a terrific speed—where? The Psalmist was, according to modern astronomy, speaking in very limited terms when he attempted to indicate the infinite nature of the divine presence.

As we ponder the problems raised by discussion of the expanding universe, especially the accepted theory of relativity that space and matter must co-exist, this question inevitably confronts us: If the conclusion of modern physicists and metaphysicians that matter in reality is non-existent be true, does it not follow that space must give way to infinity?—Christian Science Monitor.

Where Credit Is Due

Newspaper Advertising Important Factor In Keeping Things Going

It is rather noteworthy that at the April meeting of the board of directors of the Canada Cycle and Motor Company, Limited, J. W. Gibson, vice-president, explained that the important factor in enabling the company to "beat the slump" was a liberal policy of newspaper advertising. He declared that careful advertising over a period of years had created a trademark in the C.C.M. that made it an asset more valuable to the company than its whole plant and equipment. That is a remarkable statement, but the more it is studied the more it will be seen to be true.—Brantford Expositor.

B.C. Shipping Hay

First Consignment Went Forward To Straits Settlements Recently

The latest addition to the wide variety of commodities which annually are shipped from Vancouver to many parts of the world is hauled hay for the Straits Settlements. B.C. already sends milk and fish to Africa, Europe, Asia, Australasia and South America. People use B.C. flour in all the countries of the world. Australia and New Zealand eat B.C. butter in season, and Europe eats apples and other fresh fruits.

Now, it is reported, B.C. is shipping hay to Straits Settlements for elephants, the first shipment having gone forward recently.

By Ruth Rogers

SHIRTS AND SHORTS SCORE A SPORTS HIT AND YOU'VE A SKIRT TO DON FOR SPECTATOR SPORTS

Grasp this opportunity to order this pattern today. It includes the shirt and shorts and skirt. It's the smartest outfit for tennis! Camp! Hiking! Beach! Mountains! For tennis, the shirt and shorts are indispensable. And after your game you've a skirt to don. It's so easily slipped into and adjusted. It buttons from waist to hem.

If you're going to camp, you'll want several of these smart rigs. Pique, peasant linen, striped or checked seersucker, plaided gingham, cotton shirting broadcloth, etc., are attractive mediums.

It's very easily fashioned and surprisingly inexpensive. Style No. 782 is designed for sizes 16-22, 24, 26 and 28 years. Skirt requires 3 1/2 yards of 39-inch material for blouse and skirt, 3 1/2 yards of 39-inch material for shorts.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

An Interesting Survey

Shows What American Women Like Best In Newspaper

A survey recently conducted by the school of business of the University of Chicago gives information on what interests the average woman newspaper reader. According to the replies received, bridge lessons and foreign news find little favor with the fair sex. It is also significant to note that women show more interest in editorial than they do in crime news. The more important findings of the survey are summed up as follows:

First page news cartoons commanded 83 per cent. of the votes, with the fashion pictures in the women's section ranking second with 78 per cent. The comic strip came next with 68 per cent., followed by the health features with 48 per cent. and letters to the editor with 47 per cent. Foreign news ranked last with 5 per cent. of reader interest, and bridge lessons were next to the bottom with only 11 per cent.

Perhaps Canadian women's preferences as to newspaper contents differ from their American cousins. Anyhow "yellow journalism" is practically non-existent in Canada. Nor do Canadian papers play up crime news as much as they do in the United States.

The findings tend to show that bridge instruction is no longer keenly sought. Like some of the old favorite pastimes it seems to be on the downgrade. Or is it a case of players having become so competent and self-reliant that they no longer need lessons?

Farmers' Chief Difficulty

Cannot Sell Produce For Sufficient To Buy Necessaries

Rev. John Livingstone Brown, Liberal-Progressive member for L'Ange-Gardien, gave the House of Commons something to reflect over recently when he said that one of his constituents told him, "By spring you will find me the fattest and raggedest man in the country."

"He simply meant that on the farm he had plenty to eat but that the prices at which he was able to sell his produce was not sufficient to enable him to clothe himself properly," said Mr. Brown.

"Another man said to me in a jocular way, 'I wish this depression would end. I am tired of eating turkey.' It is true that there are exceptional circumstances in the West at the present time but the difficulty in most cases is not that farmers have not sufficient to eat but that they cannot dispose of their surplus at a price that will enable them to buy clothing and the other necessities and conveniences that every civilized man has a right to expect."—Lethbridge Herald.

The "Queen Mary"

"Queen Mary" likely will be the name of the much advertised Cunard liner "634," which is to be christened by the Queen at its launching Sept. 26, in the presence of the King. The choice of a name for the giant vessel has not been announced officially, but it is understood the Queen's assent to the suggestion that it be named after her has already been obtained.

Has Invaded Canada

Infectious Bronchitis Found In Poultry Of Two Provinces

Infectious bronchitis has been recognized in North America since 1922 and has been increasing in economic importance annually ever since. It has been reported in at least 29 states and in at least two provinces in Canada, according to a statement by W. R. Henshaw of the California College of Agriculture at Berkeley. "In the majority of the instances," the report states, "the disease has been introduced into new localities within the state by the purchase of mature or partly grown stock from infected areas."

"Concentration of poultry ranches and continuous brooding of chicks in a community were found to be important factors influencing the year-to-year recurrence and spread of laryngotracheitis. Evidence to support the carrier theory was obtained, but controlled experimental data were lacking."

"Prevention in an infected area is a community problem and consists of proper attention to disposal of dead birds, manure, and litter; the control of mechanical carriers; attention to the cleaning and disinfection of feed and feed sacks and poultry crates; and the control of community and plant sanitation, as well as individual attention to the health of birds. Prevention in a disease-free area involves precaution in the introduction of stock, in addition to the above recommendations."

"No satisfactory treatment for the disease was found. Careful nursing, attention to the comfort of the birds, avoidance of excessive excitement, and proper feeding were observed to be the best control measures."

Canadian Oath Of Allegiance

Has Been Made Simpler By Measure Put Through House

The House of Commons recently gave third reading to the Oath of Allegiance Act, a measure which greatly simplifies the oath and brings it into conformity with that adopted in the United Kingdom and other portions of the Empire. The new oath reads as follows: "I, (A.B.), do swear that I will be faithful and bear true allegiance to His Majesty King George the Fifth, his heirs and successors according to law. So help me God." The former oath was ponderous and resonant, one in which the person taking it swore to defend the King "against all traitorous conspiracies" and other treasons. The measure evoked no discussion.

New Metal Alloy

A new beryllium-copper alloy is said to be non-sparking under any conditions and hard enough to cut steel. The new metal will be valuable in mining and other industries where there is often grave danger of explosions caused by sparks from tools.

HERO OF THE ARCTIC SAGA HONORED

Professor Otto Yulevitch, who is credited with preserving the lives of 101 members of the Soviet Chelyuskin expedition until rescued after three months on an ice floe, is shown at Washington being welcomed by the Soviet Ambassador Troganovsky and his wife.

New Rules And Regulations To Govern Commercial Poultry Hatcheries Throughout Canada

As a result of co-operation between the provinces and the Dominion department of agriculture, new rules regulations to govern commercial poultry hatcheries throughout Canada have been made possible with the passing by parliament of an amendment to the Livestock and Livestock Products Act. This means an important safeguard to an industry that in egg production alone represents an annual turnover of about \$30,010,000. Already five of the provinces have agreed to adopt the new hatchery policy.

The proposed regulations embody the present hatchery approval rules which have been in operation for the past six years on a voluntary basis. Under the new policy, which will be proclaimed with respect to any of the provinces which desire to adopt it, all commercial hatcheries will operate under the new regulations which provide that each hatchery shall set only eggs from flocks approved by the provincial authorities; that the hatcheries and their advertising shall be under the supervision of the livestock branch of the Dominion department of agriculture.

According to this plan the quality of chicks produced in commercial hatcheries will be substantially improved since they will be hatched from eggs produced by pure bred flocks inspected by the provincial authorities. Under the provision in the regulations that all commercial hatchery advertising shall be under the supervision of the Dominion department of agriculture, being issued the public in those provinces where the regulations are in effect will be assured that any statements made in such advertising are correct.

Argentine Fights Locusts

Galvanized Iron Walls Being Built To Stop Invasion

Argentina has ordered hundreds of miles of very smooth galvanized iron sheeting to be used in building walls across the country to stop invading locusts. The sheeting will cost \$2,500,000 and construction expense will be in the hundreds of thousands of dollars. The government plans to fight the locusts with a combination of barriers and traps. It is then that he begins his devastating march. A polished wall of iron sheeting will prove too smooth to climb, and if the locusts crawl along the barrier they eventually will land in a trap. Men will be stationed there with rakes to get the unwelcome visitors into large pits, where they will be destroyed.

Radium Rained Down During Thunderstorms

Carried Into Clouds On Same Principle As Moisture

Radium, the most precious of all the elements, is rained down on the earth during thunderstorms. It was reported in Washington before the annual meeting of the American Geophysical Union by G. R. Wait and A. O. McNish of the Department of Terrestrial Magnetism, Carnegie Institution of Washington. The thunderstorm, according to their report, concentrates radium, which is carried up into the clouds by ascending air currents, just as moisture is carried up to form the clouds.

Regal Barley

Of recent years, a number of promising smooth-awned barleys have been produced by different plant-breeding institutions, including the Dominion experimental farms, but these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Regal appears most promising in the west.

Know His Flowers

Another one for Mr. Ripley, Teddy, mice chaser of a florist shop in Boston, knows his carnations. If any of the carnations are not up to the standard, Teddy, in his early morning rounds, pulls the withered blooms out of the vases with his teeth, leaving the fresh ones to bloom.

WORLD HAPPENINGS
BRIEFLY TOLD

If you are on relief in Calgary you mustn't keep a cow, unless you take a proportionate reduction in milk allowances. This is the ruling of the civil relief agency.

Nipissing Mining Company had a profit of \$146,828 for the year 1933, compared with a loss of \$161,437 for the previous year. The profit shows a judicious interest from investments.

Premier R. B. Bennett has accepted the rectorship of Queen's University. He succeeds Dr. O. D. Skelton, under-secretary of state for external affairs, who held the office for six years.

Hon. George H. Sedgewick, chairman of the tariff board, has left for England where he will visit a number of manufacturing plants which are interested in applications pending before the tariff board.

Alan Cuthbert Burns, well-known in the British West Indies, has been appointed governor of British Honduras in succession to Sir Harold Kittermaster, recently appointed governor of Nyassaland.

Pleased with the success of the Mother's Day postage stamp depicting Whistler's Mother, U. S. Postmaster General Farley said he was ready to try a Santa Claus stamp to commemorate Christmas.

Dr. Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

Creating a legal unit to which Manitoba can turn over the 1,500 acres donated from the Turtle Mountain reserve, the International Peace Gardens, incorporated, was granted a license to do business in the province.

Fires in Alberta in 1933 took toll of 30 lives compared with nine in 1932, according to the report of Fire Commissioner Henry Brace. There were 1,832 fires during the year with property loss of \$1,435,612 compared with loss of \$2,486,491 from 1,937 fires in 1932.

Rich Radium Find

Biggest Pitchblende Strike Yet Uncovered In The North

Radium ore beds at Hottah Lake, 100 miles south of Cameron bay, N.W.T., are even richer than first reports of prospecting parties stated, Edward Harleaves, Toronto mining man and managing-director of Great Bear development, revealed recently. "It is the biggest pitchblende strike ever to be found in this country or the United States," he continued. He displayed a sack of sample ore. He declared that in his company's field they have a ton of ore sacked and ready for shipment. It was taken out only with sledge hammers.

He declared that the ore is worth \$6,000 or \$7,000 a ton, and will be shipped to an eastern refinery. He declared that silver is not showing yet in the new area, as at Great Bear lake.

Legacy, a new, promising variety of oats, produced by the Cereal Division, Dominion Department of Agriculture, from a cross between Banner and Eighty Day has done particularly well in Northern Saskatchewan, Central and Northern Alberta, and in the Eastern Townships of Quebec.

Ninety-five patches were required to repair damage inflicted to wings of an aeroplane caught in a hail-storm in South Dakota.

"Blue" Spells

Reduce some women to the penitent shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves, helps to tone up the general health, gives them more pep... more charm.

Winnipeg Newspaper Union

By Ruth Rogers

COTTON BLOUSES ARE SMART, COOL FOR SUMMER, PATTERN PROVIDES FOR BOTH STYLES

Don't miss this opportunity to order today's pattern. It provides for both styles illustrated. The high neck blouse with short raglan sleeves gathered into wrist bands, is alluringly feminine.

You can fashion it of sheer cotton crepe prints, organdie novelties, cotton net, handkerchief-finish lawn prints, pastel tub silks, etc.

The V-shape neck blouse with that windblown bow is decidedly young. Any of the cotton prints as checked or striped seersucker, plaided gingham, pique, lawn, satin are attractive for it. Tub silks and linen are also lovely.

Style No. 843 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 2½ yards of 39-inch material for View A; View B requires 1½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

MOLECULES

(By Gordon H. Guest, M.A.)

Scientists believe that all matter is composed of very small particles called molecules. These molecules are invisible and cannot be observed even with the aid of the most powerful microscope. It has been calculated that it would require about forty million molecules, touching one another, to make a row one inch long. Again it has been computed that a small thimbleful of air contains about twenty-seven billion billion molecules. There are spaces between the molecules which are supposed to be much larger than the molecules themselves. These spaces between the molecules are known as the inter-molecular spaces.

Molecules are constantly in motion and they are also elastic. The hydrogen molecule, for example, has an average speed of over a mile a second and bumps against its neighbors about ten billion times per second under ordinary conditions.

In the case of gases the molecules are quite separate and distinct and have great freedom of movement. The particles of a gas appear to be perfectly elastic, and as a result their motion is slowed up when they collide with one another or when they bombard the sides of the enclosing vessel. The pressure of a gas upon the vessel is due to the half-storm of molecules upon its walls. A definite quantity of a gas left in an open vessel is capable of indefinite expansion. Gases are therefore compressible. A good illustration of this fact is that when a quart of water is evaporated it yields about seventeen hundred quarts of steam, measured under the normal pressure of the air and at the boiling point of water. This shows us why a strong vessel is required to hold steam at high pressure.

A liquid is more compact than a gas; that is, its molecules are closer to one another, and therefore have less freedom of movement. When a liquid evaporates some of the molecules escape into the air. The speed of a molecule depends upon its temperature and hence the warmer molecules of a liquid are lost first. This migration of the warmer molecules from a liquid results in a fall in temperature when a liquid evaporates. It is well known that water cools in certain countries by placing it in porous vessels in order to promote evaporation.

Solids, like liquids, are much more compact than gases. The molecules of solids are much restricted in their movements, and appear to vibrate or rotate about fixed centres of rest.

Canada expends \$135,000,000 annually to keep her schools going.

Ordinary printer's ink is used in making fingerprints.

SUNDAY SCHOOL LESSON

JUNE 3

JESUS IN THE SHADOW OF THE CROSS

Golden Text: "He went forward a little, and fell on his face, and prayed, saying, My Father, if it be possible, let this cup pass away from me: nevertheless, not as I will, but as thou wilt." Matthew 26:39.

Lesson: Matthew 26:1-7.

Devotional Reading: Psalm 42:1-5.

Explanations And Comments

Boastful Self-Confidence, verses 31-35. "It was the night before the end. The little company were met secretly in an atmosphere charged with emotion. Either they did not know or they did not realize what the crisis would mean. They only knew that the purpose for which they had come to the city was near its accomplishment. The secrecy of their meeting places, the solemn and mysterious actions of their Lord, the departure of Judas fading into the night; the gracious words of comfort, spoken to his friends by their master—all these things had moved their hearts deeply. They were like men at a meat talk on the eve of action. It was the stifling silence before the storm breaks. In such a mood of excitement they then listened to the chilling words spoken by Jesus" (Edwards).

He, the Shepherd of the flock, was to be put to death that very night, and the sheep, were to be scattered, for they would all be offended in him, that is, caused to stumble by what was to befall him, as it was written (Zech. 13:7). Then he added the encouraging words: "After I am raised up, I will go before you into Galilee." "If all shall be offended in thee," vehemently Peter exclaimed, "I will never be offended." He is not sure of the other disciples, but he is certain in regard to himself! How little he knew of his own weakness! Even after Jesus warned Peter that "this very night, before the cock crow, thou shalt deny me thrice," Peter reiterated his statement, and this time more forcibly: "Even if I shall die with thee, yet I will not I deny thee."

In Gethsemane, verses 36-46. Jesus led the disciples to the Garden of Gethsemane, retracing for the last time his oft-repeated journey thither for seasons of prayer and meditation. "Sit ye here," he said to his disciples, "while I go yonder and pray."

Jesus began to be sorrowful and was troubled, and even said to his disciples, "My soul is exceedingly sorrowful, even unto death." Before this he had talked calmly with them of the cup he was about to drink but now, in truth, he was "clean forewarned, forewarned."

Electricity Helps Farmers

Greater Use In Scotland Is Making Life Easier

Farmers of Scotland are using electricity to speed growth and make life easier. Nearly 400 are employing it for milking and in butter making. Market gardeners have recently found that they can accelerate the growth of vegetables by starting them in a hot-bed warmed by electricity. The "magical current" is just being introduced into hen houses, lights early in the evening and morning, deluding the biddies into believing the day is longer and thus causing them to lay more eggs. Ultra-violet rays produced from a lamp is being used extensively in the rearing of chicks.

May Ship Via Panama Canal

Route Being Investigated By B.C. Livestock Interests

The proposal by British Columbia livestock interests that beef cattle might profitably be shipped to European or British markets is again being investigated. A proposal has been advanced that B.C. cattle could be shipped alive through the Panama Canal from Vancouver and the feasibility of this is under consideration.

Statistics reveal that the move would not be so much a means of finding an outlet for any excess production, since B.C. already imports more than half as much beef as it produces, but would merely serve as an avenue for bolstering the price, if it were feasible. Stockmen claim that Alberta beef depresses their prices to such an extent that the industry becomes unprofitable for the B.C. producers. By shipping to the British market, according to the argument advanced, B.C. cattlemen could get a better price for their beef than they can on the home market, even with rates included.

Dr. W. E. Gunn, livestock commissioner, and J. A. Grant, marketing commissioner have been discussing the matter with livestock men during their recent visit to Williams Lake.

A Women's Who's Who

With an array of over 6,000 sketches of English women, Hutchinson & Co., the London publishers, will soon launch a "Women's Who's Who". The list has taken two years to prepare and contains the names of 150 women air pilots, 3,500 women doctors, 200 women justices of the peace, 300 women county councillors, 84 women architects, and dozens of solicitors, estate managers, housing pioneers and members of parliament.

SWEEPSTAKE BILL IS DEFEATED BY NON-PARTY VOTE

Ottawa.—The Fraser bill to legalize hospital sweepstakes was defeated in the House of Commons 105-57 in a division that cut across party lines. It met the same fate last year.

With the whips off, in an open vote, the three party leaders, Premier R. B. Bennett, Rt. Hon. MacKenzie King and J. S. Woodsworth, united in opposing the bill. Every member of the Bennett cabinet, excepting Solicitor-General Maurice Dupre, voted against it.

The bill, which would empower provincial attorneys-general to authorize sweepstakes for the benefit of hospitals and charitable institutions, gained its support mostly from Quebec members, the majority from the Liberal benches. It was sponsored by J. A. Fraser, Conservative member for Cariboo, B.C., after passing the senate 10 days ago by a narrow margin.

Opposing the bill were 67 Conservatives, 27 Liberals, eight Progressives, two Independents and one Laborite. Supporting it were 22 Conservatives, 33 Liberals and two Laborites.

Defeat for the bill was engineered by A. M. Carmichael, Progressive member for Kinkora, a retired minister, who moved the sixth motion last early in the day. When the house passed the Carmichael motion, it killed the bill.

Dominion Loan Arranged

Three Prairie Provinces Are Assisted By Federal Treasury

Ottawa.—Orders-in-council passed under the Relief Act disclose that a further loan of \$600,000 on provincial treasury bills at five per cent, maturing May 28, 1935, will be made by the federal treasury to enable Manitoba to consolidate two similar loans maturing in May and June of this year. The maturing loans are for \$500,000 expiring May 28, and \$100,000 expiring June 15.

A loan of \$284,000 has also been authorized to assist the Manitoba government in meeting its share of relief costs during May and June of this year.

Saskatchewan and Alberta will be assisted by the federal treasury with loans up to \$750,000 each to enable them to proceed with road building operations this year, according to orders-in-council passed under the Relief Act. The amounts will be advanced as the work proceeds and will be secured by provincial treasury bills at five per cent. interest.

Case Has Been Closed

Ottawa.—The Dominion government is discharged from any liability as guarantor of bonds of the Beauharnois corporation, Prime Minister R. B. Bennett informed the House of Commons. In addition, the cost of the Beauharnois investigations in the House of Commons and senate amounting to \$43,536 has been paid.

Song And Drama

Lethbridge, Alta.—Lethbridge was a city of song and drama recently. Five halls were required to stage the elocution and vocal classes for 500 boys and girls attending the annual school and dramatic festival of southern Alberta. It is held in conjunction with the 27th annual musical festival of Alberta.

Vote To Strike

Lethbridge, Alta.—Demanding recognition of the United Mine Workers of Canada, 350 miners at the Nain-Michel mines of the Crown's Nest Pass Coal Company voted to strike, but left decision as to when the walkout is to start until after further consideration.

Pay Increases

Winnipeg.—Pay increases are in sight for Winnipeg city employees. City council has approved pay increases for 266 employees of the city hydro and asked the finance committee to consider favorably pay increases for all other employees.

W. N. U. 2048

Would Regulate Trade

Proposal Made Before Parliamentary Price Spread Probe

Ottawa.—Wiping out of the Combines Investigation Act to be replaced by legislation giving the Dominion government power to regulate trade and commerce, was proposed before the parliamentary price spreads probe. The suggestion was made by C. H. Carle, president of the Goodyear Tire and Rubber Company.

The principal object of the Combines Act was to safeguard the public against unwarranted or unfair prices. This safeguard, to which the public was entitled, should be brought about in a more constructive way, the rubber company head stated. Companies should not be prevented from organizing so as to become highly efficient.

Many phases of trade and commerce might be regulated as well as high prices, Mr. Carle told the inquiry. Low prices were as destructive as high prices.

The government owed it to industry to give it adequate supervision. His proposal would develop healthy business and be a proper safeguard for the public.

Balanced Railway Budget

President Beatty Of The C.P.R. Favors Unified Railway System

Montreal.—A balanced railway budget within a reasonable period of time was promised by E. W. Beatty, P.C., president of the Canadian Pacific Railway, if his scheme of a unified and privately administered system were adopted by the railroads of Canada. He made his promise in the course of an address to the Canadian Political Science Association, holding its annual meeting here. He said the unified system would be able to finance justifiably extensions which expanding settlement and development might in future demand.

Mr. Beatty's subject was "The Canadian Transportation Problem," and he dealt with the present situation created by the Canadian National Railways debt after outlining the physical and political events leading up to it. He styled the history of Canadian government railways since 1900 as a "veritable rags' progress."

Mr. Beatty announced that displacement of labor would be overcome through the normal turnover.

Britain's Stand On War Debt

London.—Modification of Great Britain's stand on the war debts question was hinted strongly in informed circles, with the possibility that the government may approach Washington for a discussion of the subject.

Decoration For Sir Geo. Perley

Ottawa.—Sir George H. Perley has received one more decoration to add to the many which now adorn him. The latest is one of a military character—the Canadian efficiency decoration.

Medals For Mounted Police

Ottawa.—More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

CRITICIZES FACT

Malcolm MacDonald, son of the British Prime Minister, and Under Secretary for the Dominions, told the House of Commons he would not say the United Kingdom was "entirely satisfied with what Canada and Australia had done in the way of implementing their Ottawa Economic agreements."

B.C. Proposals

Negotiations With Premier Bennett Are Revealed

Vancouver.—Premier T. D. Pattullo returned to British Columbia to reveal two new and interesting facts evolved from his negotiations with Prime Minister R. B. Bennett.

The Dominion government's contribution to a provincial works program will be by direct cash payment rather than by loan, he said. The amount or nature of the contribution has not been determined.

Mr. Pattullo said he has notified Mr. Bennett that the province will submit a definite proposal to the Dominion to turn over the Pacific Great Eastern Railway at replacement value. He said valuation of the railway on this basis will be started at once.

Sweepstake Winnings

Should Be Forfeited To Crown And Not The Informant

Ottawa.—Two changes in the law governing lotteries were suggested in the sweepstakes' debate by Hon. Hugh Guthrie, minister of justice. The debate ended in the bill to legalize sweepstakes being killed.

Under the existing clause in the criminal code when a man wins a lottery prize, it is forfeited to any informer who may succeed against him in court. This was not a suitable provision, Mr. Guthrie thought. The winnings should be forfeited to the crown, not to the informant.

The fine for purchasing a lottery ticket was \$20. This might very well be raised to a larger amount, the minister suggested.

Winnipeg Strike Settled

Winnipeg.—The partial strike of employees at the Western Packing Company here which has disrupted wholesale meat deliveries since March 7 was amicably settled by mutual agreement and the men returned to work. Wages have been increased by 10 per cent. an hour for the lower paid categories and 7½ for the higher.

British Columbia Reports Improved Business

Early Promise Of Better Conditions Being Borne Out

Victoria.—The first quarter of 1934 has borne out early promise of a happier year for British Columbia. Bank clearings were up some 25 per cent. over the same period in 1933. Lumber production was up 80 per cent. to 487,336,000, f.b.m. Lumber exports by water were 291,139,007 f.b.m., about double that for the first four months of 1933.

Gold production at 61,833 ounces showed an increase of 22 per cent. Silver, lead, zinc and copper were reported improving though current figures are not available. Coal gained five per cent.

Agricultural products were up 10 per cent. in volume with prices firmer.

Payrolls are about \$10,000,000 monthly, up about \$200,000 per month, inferred from the fact the one per cent. tax is yielding \$100,000 monthly, and this excludes incomes below \$50 a month.

Decline in number of persons on relief was at about the rate of 12,000 per month for March and April compared with those months last year.

Advocates Silver Policy

President Roosevelt Wants Authority To Make Necessary Purchases

Washington.—President Roosevelt recommended to the United States congress that it declare American policy to be "to increase the amount of silver in our monetary stocks with the ultimate objective of having and maintaining one-fourth of their monetary value in silver and three-fourths in gold."

The policy would be mandatory. The president, in fulfillment of his agreement with congressional silver advocates, said he should be "authorized and directed to make the purchases of silver necessary to attain this ultimate objective."

Payments for present silver holdings in the United States would be limited to 50 cents an ounce, and profits so made would be taxed 50 per cent.

Pointing to a world-wide bi-metallic agreement as the ultimate solution of the silver problem, Mr. Roosevelt revealed to congress he has already begun negotiations with neighboring countries "in regard to the use of both silver and gold, preferably on a co-ordinated basis, as a standard of monetary value."

Lowers Record

Miss Joan Batten Establishes New Record For Women In Flight From England To Australia

Darwin, Australia.—Miss Joan Batten, New Zealand aviator, set a new women's record for an England-to-Australia flight when she set down her plane here. She lowered the 19-day record, established by Mrs. Amy Molison in 1930, by 2½ days.

Mrs. Molison required 19 days to cover the route that since has been flown in seven days by male aviators. Miss Batten kept well ahead of the record all the way from London.

BRITAIN PLANS TO ASSIST OWN MEAT PRODUCERS

London.—The Daily Telegraph forecast the British government plans to help its own meat producers when the Ottawa conference agreements respecting imported meat expire on June 30. The newspaper said the government is determined first and foremost to look after the needs of the home producers.

Should the Dominions refuse to agree to a new scheme, limiting meat imports, the British government would take steps to restrict imports, said the Daily Telegraph. It would be compelled to choose between imposing restrictions by way of quotas to both Dominion and foreign imports of frozen and chilled meats entering the United Kingdom and "insulating" the home market, the paper said.

This "insulating" step, the Daily Telegraph said, might be taken to protect the home producer from the shock of abnormally low market prices by making a temporary period as was done for a temporary period for the benefit of home dairy farmers.

Drouth In Russia

Mobilization Of Fire Departments Ordered To Water Parched Crops

Rostov, U.S.S.R.—With a mobilization akin to a military movement, Communist party chiefs started a farflung war on drouth which menaces the Russian wheat fields.

In the Azov-Black Sea region the party chief of the regional agricultural department, carrying out instructions from Moscow ordered mobilization of all city and village fire departments and started concentrating all available barrels at strategic points in the fields.

All able bodied men who can be spared from other tasks are ordered to help bring water to the parched crops.

Both winter and summer crops, the party chief said, "are in sad condition and getting yellow because of lack of moisture." Sprinkling from airplanes will be undertaken.

Meanwhile, light to heavy rains were reported to have fallen in south-western Ukraine and part of the lower Volga region, two large regions of Soviet Russia's chief grain-growing section.

Awarded Gold Medal

Miss Jessie Gray Of Toronto Wins Honors In Medical Graduating Class

Toronto.—Miss Jessie Gray, of Toronto, was awarded the gold medal in the graduating medical class of the University of Toronto, the university announced.

Second place in the medical graduating class went to T. Kakyma, Japanese student from Cumberland, B.C., and third honors went to R. C. Dickson, of Ottawa.

Byrd Reports Severe Cold

Little America, Antarctica.—A temperature of 72 degrees below zero was reported May 21 by Rear-Admiral Richard E. Byrd in his isolated outpost on the Ross ice barrier. Since the coldest part of the Antarctic winter is still to come, this temperature indicated Admiral Byrd's prediction that his base may be the coldest spot ever inhabited will be fulfilled.

No Insurance Plans

Ottawa.—While believing some form of contributory unemployment insurance is inevitable, Prime Minister R. B. Bennett was unable to inform the House of Commons if any legislative action would be taken at the present session.

Eligible For Medal

Ottawa.—More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

ONTARIO'S POLITICAL ARENA CLEARED FOR BATTLE

On June 19th, the people of Ontario will flock to the polls to decide what party shall sit on the Government benches at the next session. Above are the political leaders who are in the midst of one of the most strenuous election campaigns in the history of the province. Left to right: Mitchell Hepburn, leader of the Liberal party; Premier George S. Henry, leader of the Conservatives; and H. C. Nixon, head of the Progressives.

Rural Education Committee.

Summoned by Chairman Baker,
Minister of Education, the special
Legislative committee appointed
by resolution at the last session of
the House to probe the entire
question of rural education in Al-
berta, will meet in Edmonton on
June 8 and 9. The purpose of the
committee is to make a complete
survey of the rural school situation
and report thereon. Much data has
already been gathered and reports
of similar surveys in other prov-
inces are on file. The first meeting
will be for organisation purposes
and to map out a program of in-
quiry.

The Municipal District of Inga No. 520.

PUBLIC NOTICE

IS HEREBY GIVEN that there
has been introduced in the Coun-
cil of the Municipal District of
Inga No. 520 a By-Law of which
the following is a short synopsis:
—"That in order to provide for
the hospitalization of sick residents
of that portion of the Municipal
District of Inga No. 520 which is
not already included in the Ono-
way Municipal Hospital District
No. 7 and in order to carry out
the provisions of the Municipal
District Act and the Hospitals Act
in that behalf. The Council shall
enter into an agreement or agree-
ments with approved Hospital or
Hospitals for the care and treat-
ment of sick residents of that por-
tion of the District which is not
already included in the Onoway
Municipal Hospital District No. 7.

Which agreement provides for
payment by this said portion of the
District to said Hospital or Hospi-
tals entering into the agreement
the sum of seventy-five cents per
patient per patient day for Public
Ward patients.

The payment of such fees to
relieve the Municipality from all
or any further claim or liability
for hospitalization of such pa-
tients."

And that a copy of same may be
seen at each of the following places—
Office of the Secretary Treasurer,
Residence of the Councillors.

And further that unless within
thirty days from publication of this
Notice at least fifteen per cent of the
proprietary electors of the Municipal
District petition the Council to sub-
mit such By-Law to the vote of the
proprietary electors of the Municipal
District, the Council will proceed to
pass the same.

Dated at Joffre, Alberta, this 22d
day of May, 1934.

JOSEPH REST,
Secretary Treasurer.

Safer Headlights.

With motor cars traveling at
higher speeds each year, the need
for powerful illumination has in-
creased. At the same time a need
for properly protecting oncoming
drivers from dangerous and illegal
glare has increased. Pontiac en-
gineers have met this double prob-
lem in the 1934 models by a multi-
beam combination for country,
city and passing which eliminates
glare and yet provides sufficient
light where it is most needed. For
country driving a strong beam
from each light stretches far ahead
and spreads each side of the road.
When passing approaching cars
the left hand headlight is depressed
below the eyes of the approaching
driver. The beam from the right
hand headlight is thrown ahead
as before with that portion that
would shine down the left hand
side of the road masked off by the
lens. This provides a strong beam
which will illuminate objects to
right side of the road.

R. C. Services.

Rev Father Kosieski, of

NATURALLY we are proud to have created Canada's
most popular automobile. All the more so because
people are counting values—comparing quality—checking
on delivered prices—as never before in automobile history.

Chevrolet has always been stronger on proof of value
than on mere "claims". People recognize this in Chevrolet's
many exclusive features: Fully-enclosed, protected "Knee-
Action". Body by Fisher, valve-in-head six cylinder engine
with Blue Flame head, Fisher built-in Ventilation, exclu-
sive YK frame, to mention just a few.

And just as long as motorists go on comparing, check-
ing and testing, Chevrolet will hold and increase its great
sales leadership. Because Chevrolet refuses to compromise
on quality. The industry's leading engineers . . . the great
General Motors Proving Ground . . . and an organization
with "an ear to the ground and an eye to the future" . . .
take care of that. Low delivered prices—easy GMAC terms.

THE HOLBORN PICNIC PROVES BIG SUCCESS.

Splendid weather conditions on Victoria Day helped to make the eleventh annual picnic of the Holborn U.F.A. Local a record breaker. The crowd, coming in automobiles, jitneys, by team, afoot and mounted, began to gather early, and by the time the ball games started all the available parking space in the grounds was occupied.

The various games and sports contests were watched very closely, and the roster crews for the several contests had a very busy afternoon. Following is a summary of the events:

The day was opened with a basketball game between Holborn and Strawberry; the latter losing out. Stony and Bright Bank took the field then, and after a hard tussle Stony won. Then Stony and Strawberry locked horns, the former winning.

In baseball Holborn trailed behind by losing the opening game to Sand Hills.

The School team fared very well against Bright Bank. Then Bright Bank beat Rosenthal. The play-off—Bright Bank and Sand Hills—will be played at Holborn on June 3.

The sports were grand, and great praise and thanks must be given the donors. Excellent prizes were given, and they were truly won. Those who gave to make the picnic a success were—

Base Ball Games.

The Walther League is making a good attempt to keep baseball alive in town. They have played some good games and have more to come. Sunday afternoons are their usual home days.

During the past week and 2 good games were seen—on Saturday Concordia College (of hockey fame) took Stony's 9 into camp by a score of 3-2. It was a good game and here's hoping the boys keep up the good work. E W Kenders hurled great ball for the losers.

Sunday the fates were for the local crew. They betted their way to a sweet revenge win over Rosenthal by 6-5. This was a good close game and was watched by the season's best turnout. "Ducay" Darimont acted as umpire.

Watch for future games, and come up and see the boys in action some time.

Holborn Happenings.

Holborn is putting on a 10th anniversary dance on July 4. It is not decided what orchestra will be hired; but it is said that it will be a stranger. Prizes and novelties will be given out that evening.

Hurray! Holborn is beginning to wake up. She played Grammie May 21. There was very good playing on both sides. The game ended with a score of 22 for Holborn, 14 for Grammie. Grammie will play at Holborn June 10.

Seale's Grain Report.

The Seale-Goop Report issued May 21, consisting of reports from 1088 correspondents located in Western Canada, indicated a decrease in wheat acreage of 2,440,000 acres, or an average of 2.7 p.c. for the 3 provinces, made up of 6.2 p.c. in Manitoba, 12.8 in Saskatchewan, 6.1 in Alberta.

24—St Jean Baptiste Day

Taken to the Hospital.

Alex. Zeiler was taken to the Misericordia hospital on Saturday evening. He had been "batching" on his farm at North Glory Hills, and was found unconscious in his shack by a neighbor on Saturday. On being seen in the hospital by a friend on Tuesday, Aleck said "all be remembered" was going to bed Friday night and waking up in the hospital on Monday.

Spruce Grove News.

The Grove's basketball team of girls from the High school continue on their victorious course. This team went up to Stony last Friday evening and cleaned up on the Stony girls to the tune of 21-5. Grove's line up: Frieda Goebel, Claire Groat, Crissie Groat, Lydia Schutz, Mary Shwinbein; Subs—Phyllis Sherwin and Dorothy Schutz. A good crowd of rooters accompanied the team.

Messrs J Whitelock and H Eaders made a business trip on Monday to Stony.

Those who do business with the local elevators are pleased with the improvements which have been made to the road leading in from the Highway.

Mr Hy Brox, the Northern explorer, made a business trip to the City yesterday.

Brightbank's Bear's Tale.

There haven't been any bears seen in this locality for a number of years until a few days ago, when

W Kroye was going home from school and was sport-outting across H Summerfield's land. He suddenly met with a large black bear: the bear sat down quite comfortably and looked at the lad. Willy went back, got Johnny Summerfield; the 2 lads armed themselves with a 30 30 and a spaniel dog and went back after Mr Lear. They caught up to him. When the dog started barking the bear went up a spruce tree. Johnny shot, hitting the bear in the foot; the bear lost his hold on the tree and came sliding down so sudden that the 2 lads shinned up another tree. When Mr Bear reached the ground he growled, slapped at the dog, then suddenly made off into the brush, to the entire satisfaction of the hunters.

Old Warden School District.

Among the items in Edmonton Bulletin's "Forty Years Ago" column on Friday last is this:

Warden public school district, Stony Plain, has been authorized to borrow money with which to build a new school house.
